University Seattle

Join us to hear about home making—from conception to implementation—and its far-reaching emergent qualities. The desire for a sustainable way of living through the use of unconventional materials and nontraditional methods of construction triggered challenges and brought unexpected outcomes.

Farouk Seif, Ph.D, AIA has taught design, creative thinking and visual communication at several universities in the United States and abroad. He has published, lectured and exhibited his work internationally. His interests focus on the metaphysics of design, wholeness and design communication.

Antioch University, 2326 Sixth Ave., Seattle
