

Center for Creative Change

presents a lecture and slide presentation

where nature meets culture

Robina McCurdy has been working as a sustainable systems consultant educator/designer in participatory land-use design for the past 17 years. She has worked with households, neighborhoods, schools, farms, ecovillages and whole bioregions in Aotearoa/New Zealand, Australia, South Africa, Ireland, Brazil and the United States.

The goal of the powerful facilitation methodology she has developed is to create sustainable community in harmony with the natural environment.

McCurdy lives in Golden Bay, New Zealand, where she is a founder-member of Tui Community and Land Trust, where new forms of social organization are being pioneered. Tui is dedicated to human capacity building, living with minimal impact on the Earth, working with the rhythms of nature, generating ethical livelihood, learning through doing – and, overall, creating a sustainable small village culture.

a look at vibrant working examples of the application of ecological principles and permaculture design tools to socio-cultural, physical, technological, environmental and economic systems

featuring Robina McCurdy, New Zealand founder-trustee of the Institute of Earthcare Education Aotearoa and developer-director of its educational program PLANET Organic

Tues., June 29, 7-9 p.m.

Antioch campus, room 100

FREE AND OPEN TO THE PUBLIC

Antioch University, 2326 Sixth Ave., Seattle
